To Whom It May Concern:

Reference: Knights Security Services, LLC

It is my pleasure to recommend Knights Security Services, LLC. While attending the United Financial Services Group convention last year, I decided to upgrade our security system with two color cameras. After talking to several vendors, I decided to work with Knights Security for the following reasons:

1. The President of Knights Security Services was happy to arrange for a technician to travel from Philadelphia, PA to Salisbury, MD to assess my business needs. Other companies felt they could not warrant the three-hour drive.
2. The technician called shortly after the convention and arranged to come to the center. After looking at the two color cameras, I decided to install nine new color cameras and a Digital Video Recorder. I felt that this new system was necessary to insure safety and security of our check cashing business. City, county, and state police often use our system to help them locate persons, also, a Special Agent from the Social Security Administration used our system to find people trying to cash more than one SSI or SSA check. The technician was very well prepared and knowledgeable about the system and the installation went smoothly.
3. The technician has made several trips to our center to ensure our satisfaction and I am very happy with their service. The system is very user friendly and the picture quality is exemplary. Since we have installed this system, we have won four court cases using our color pictures. This may not have been possible with our lower quality black and white photos.

I am very pleased with the quality of service and installation that Knights Security Services has provided and highly recommend this company to any one interested in a new security system or a system upgrade. Please feel free to call me if you should have further questions.

Cordially,

Paul W. Coffin, Jr.
